This is a topic index for the political risk newsletter *Inside Iraqi Politics*. Entries are grouped by category – Topics, Provinces, Individuals, Groups & Institutions, and Countries. Topics and Provinces are included when they are the topic of a feature article, or in exceptional cases, are the focus of the *National Scene*. For persons, state institutions, companies or foreign countries, they are included only where they are the focus of significant discussion, not simply mentioned as part of each issue’s review of events. Individuals are listed beginning with the first name because sources use alternative family or tribal names for the last name. Numbers refer to issue number.

Beginning with No. 93, *IIP* began publishing a one-page section in each issue, *Political Economy in Brief*, in order to better serve subscribers with an interest in economic policy topics. Then in *IIP 110* we began running a three-page *Political Economy in Focus* section which now appears every other issue (the one covering the last half of each month). The contents of the *Political Economy* include such topics as budget and oil revenue issues, federal economic policies, parliamentary testimony and debates, specific transactions of note and provincial economic challenges. Please note that none of these items appear in this index, although a if we publish a feature article related to an economic issue, outside then *Political Economy* segment, then it does appear.
